SUMMARY

Backend-focused MERN Stack Developer who designs systems that stay reliable as they scale built a zero-downtime migration strategy and a role-gated access architecture in production at Quba Info Tech. Ships full-stack when needed (React, Next.js), but the core strength is backend systems built to survive real schema changes and real user load.

WORK EXPERIENCE

June 2026 - Present

MERN Stack Developer , Quba Info Tech

- Accomplished safer production schema changes across [X] migrations, as measured by zero rollback incidents, by designing and executing phased Prisma ORM migrations against a live MySQL database.
- Accomplished controlled access across [X] application modules, as measured by [X] distinct user roles enforced without a single unauthorized-access incident, by implementing role-based access control (RBAC) and secure authentication.
- Accomplished a working multi-course enrollment system, as measured by [X] courses/students supported concurrently, by architecting the enrollment data model and integrating it with Next.js/React frontends in an Agile/Scrum workflow using Jira and Slack.

MERN Stack Developer Intern , Quba Info Tech

Feb 2026 - May 2026

- Accomplished production-ready API delivery across [X] RESTful endpoints, as measured by [X] endpoints passing senior review with no post-merge rework, by building and consuming APIs in Node.js and Express.js.
- Shipped [X] frontend features on schedule in Next.js/React under senior developer guidance, using Git and Jira-based Agile workflows.

MERN Stack Developer Trainee, Valudas Tech Park

June 2024 - Jan 2026

- Accomplished a live, production-deployed business website for Sheetal Sweets & Bakery, as measured by [X]% uptime since launch, by building the site in React/Node.js/Express/MySQL and deploying it on a Hostinger VPS with Nginx and PM2.
- Accomplished secure user access across multiple projects, as measured by zero reported authentication failures, by implementing JWT authentication and Google OAuth across RESTful APIs.

TECHNICAL SKILLS

- Backend:** Node.js, Express.js, Prisma ORM, REST APIs, JWT Auth, RBAC design
 - Frontend:** React.js, Next.js, JavaScript, Tailwind CSS, HTML5, CSS3
 - Database:** MySQL
 - Tools:** Git, GitHub, Postman, VS Code, Slack
-

EDUCATION

Gokul Global University

July 2024 – Present

Bachelor of Science in Information Technology (BSC IT)

Exam-based program structure (no mandatory attendance), pursued alongside full-time industry work

PROJECTS

Sheetal Sweets & Bakery | [Live site](#)

Technology: React, Node.js, Express.js, MySQL

Accomplished a live, production-deployed business website, as measured by confirmed uptime and reachability post-launch, by building a fully responsive React frontend and deploying it on a Hostinger VPS with Nginx reverse proxy and PM2 process management.

ZepX E-commerce Platform | [Github](#)

Technology: React, Node.js, Express.js, MySQL, Razorpay, Google Auth

Accomplished a fully functional e-commerce platform built from scratch, as measured by a complete cart-to-checkout flow with live Razorpay payment processing, by developing the MERN Stack in React, Node.js, Express, and MySQL with JWT authentication and an admin dashboard.
